The latest in

Engine Carbon Clean

Technology

In just 30 minutes*, one HydroFlow service will safely reduce carbon build-up and deposits within the engine and exhaust.

*60 minutes for Diesel Engines.

Figures based on Maxi 4600 machine

How does it work?

HydroFlow generates ortho-Oxyhydrogen gas through the electrolysis of water, which when inserted into the air intake, increases both the temperature and explosive force of the combustion.

These increases result in carbon deposits being stripped away and burnt off from all major components of the engine and exhaust system, including EGR Valve, Turbo, Pistons, Cylinders, Lambdas, Spark Plugs, DPFs, CATs and Silencers.

Feedback & Results

HydroFlow Fife added 2 new photos.
29 June · €

Last thing tonight a Toyota Auris came in from another garage. They had cleaned out a sticking EGR valve, codes had cleared but left 1 permanent fault for DPF choked. 1 hour on the Hydroflow and bingo, 0 faults and pulling like a train again.

Our first Hydroflow treatment today, well deserved & well needed...she's smoother, faster and generally in better health.
Thanks again Mark Tilyer well worth it

Hydroflow engine clean done on my taxi on Tuesday and what a difference it has made to every aspect of the engine throttle response and power is back amazing! Thanks Stan

More amazing results from the hydrogen engine carbon cleaner!
This vw caddy 1.8tdi limped to us just before we closed today, fully in limp mode, DPF light on, coil light flashing, and the car would not do a regen. I said I would stay behind for him to have a full hour on the machine, as he said he was desperate for it fixing for work.
After an hour clean, the dpf and coil light were not on, the car was out of limp mode, and drove better than ever!

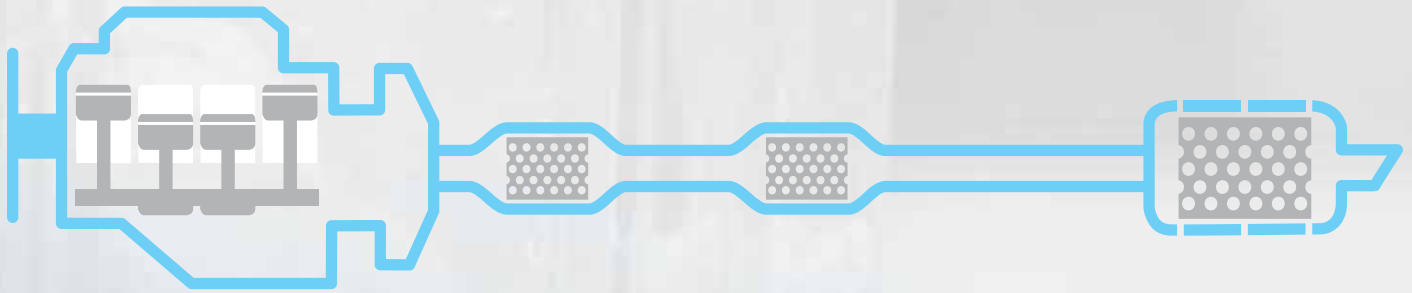

HydroFlow

COMPLETE ENGINE CLEAN

Proven to help decarbonise
the following vehicle components:

✓ ENGINE

✓ DPF

✓ CAT

✓ EXHAUST

Did you know that with each litre of fuel used in an engine,
only 25% is used to generate performance!

The remaining 75% is wasted – generating mostly heat, highly contaminant gases and carbon residues.

These carbon deposits build up over time creating obstructions within the internal parts of the engine.
Difficult to detect – these obstructions can at a minimum result in increased fuel consumption and poor
emissions – at worst they can cause engine failure often requiring costly repair.

Key Benefits

Through social media and word of mouth recommendations, drivers are quickly becoming aware of the benefits an Engine Carbon Clean can bring.

Your customers will appreciate the following benefits of a HydroFlow service:

- SAVINGS IN FUEL (8% - 15%)
- CARBON REMOVAL PREVENTS EXCESSIVE WEAR AND TEAR
- RESTORES ENGINE PERFORMANCE & EFFICIENCY
- REDUCES SMOKE & EMISSIONS
- CHEMICAL-FREE PROCESS

Investment return in *record time...*

These returns are made on the basis of 21 working days in a month, with a HydroFlow service charged at £125.

Once established, it would not be uncommon for a garage to average 4 services in one day.

HydroFlow Services	Est. Monthly Earnings
1/per day	£2625
2/per day	£5250
3/per day	£7875
4/per day	£10500

FAQ's

REMEMBER! HydroFlow requires just Distilled Water and Electricity - **NO** expensive on-going consumables.

Does HydroFlow require a dedicated operator?

Although we provide training as part of your signup process, once the feed is connected to the air intake, HydroFlow can be operated by almost anybody - even with no training.

Is it true that all it requires is just water?

(Distilled Water) to be precise but other than being plugged into an electrical outlet, all HydroFlow machines require no on-going expensive consumables.

How is HydroFlow marketed?

We have a dedicated website at www.hydro-flow.info, featuring a map of all registered Service Centres. We also supply branded promotional material for your garage reception/showroom.

The HydroFlow Range

Our HydroFlow range consists of three separate machines, depending on the type and amount of work you'll be doing. Prices start from just £4200 for the Mini 300+. Finance options also available.
